Accumetric, LLC markets an extensive line of sealants and adhesives products under the BOSS label serving many industrial markets. We manufacture neutral cure silicone sealants, firestop caulks, silicone compounds, MS polymer, latex sealants. In addition, we custom/contract package one and two component adhesives, sealants and other chemicals.

Air Products and Chemicals, Inc. BOOTH 9 & 16

Strengthening the bonds of adhesives and sealants

AEROSIL® fumed silicas are specially designed to advance the manufacturing, quality and performance of adhesives and sealants to improve the way we drive, fly, work, play and live.

As adhesives and sealants evolve to become the bonding of choice in many industries, formulators must respond to the continual challenges of more demanding applications. AEROSIL® fumed silicas provide formulators the characteristics and properties to successfully meet those challenges.

AEROSIL® fumed silicas have long been known to improve the properties of chemically curing and solvent-based adhesives and sealants. However, the use of AEROSIL® in waterborne systems improves adhesive and cohesive properties of both adhesives and sealants resulting in increased use by formulators. In addition to hydrophilic grades, the use of hydrophobic grades of fumed silica is a growing trend in highly polar systems.

Evonik Degussa Corporation now offers many of our products in aqueous dispersion form. Please call us to discuss the use of AERODISP® in your formulations. Find your AEROSIL® fumed silica solutions at www.aerosil.com.

Evonik. Power to create.

Reynolds Industries, Inc. offers a complete line of mixers, vessels, press out systems, controls and automation. Our services include design, engineering, fabrication, installation, training and service and repair. Technical sales personnel will be available in our booth to discuss all your mixing requirements. www.reynoldsmixers.com

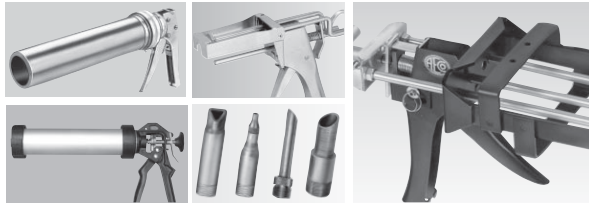

Engineered Dispensing Solutions!

Albion Engineering, a recognized leader in the manufacturing of precision dispensing tools, has been on the leading edge of tool design for almost 80 years.

Don't settle for anything less than the best.

In addition to offering technical support, our full line of products come with an Albion warranty and our commitment to professional quality tools.

For more information visit us at our website or request our catalog.

Albion Engineering. Solving your dispensing tool needs.

SpecialChem is the Innovation & Solutions Accelerator in the domain of specialty raw materials and formulated products. Beside our historical platform www.specialchem4adhesives.com dedicated to resins and additives for adhesives & sealants formulation, we have developed in partnership with the ASC www.omnexus4adhesives.com, focused on new bonding solutions with adhesives & sealants.

heat transfer fluid systems

water temperature control systems

MOKON
 Design is the Difference™

steam has met its match with MOKON.

Circulating Liquid Temperature Control Systems

Steam isn't your only option for process heating and cooling. At Mokon, we offer an alternative to steam for process temperature control. Our wide array of portable water, heat transfer fluid and chiller systems gives you higher precision temperature control and greater energy efficiency. Mokon systems are compact and can easily be moved to any space, eliminating the need for a central boiler.

- Automatic heating and cooling
- Control temperature to within ±1°F
- Temperatures range up to 650°F
- NEMA 1, 4, 7, 12 electrical enclosures
- UL labeled electrical sub-panel
- Stainless steel cabinetry
- Clean room or wash down compatible designs

Consider the possibilities of temperature control without steam. Consider Mokon.
