Progress Adhesive with Economic Surface Finishes
Need help getting into a sticky situation? Economic in-line application features improve adhesion for a wide variety of applications, including printing, coating, laminating, bonding or sealing. Our adhesive product line features the Dyno-A-Mile (DM) air plasma treaters, our new Dyno-A-Mile (DM) laser air treaters, and Dyno-A-Mile™ Barco plasma systems. Put these technologies to use now with the following links:

Relumers
Relumers adhesives are used in a wide variety of applications, including EVA, PSA, acrylic, acrylic copolymers and UV. The UV 90 family of products is a proven winner in the complete range of adhesive applications, including precision sensitive, laminating, packaging, labeling, identification, medical and electronics. Call office Applications at 800-524-8000 for more information. ISO 9001 and ISO 14001 registered.

Carbafill™ Crosslinking
Carbafill™ is a multi-functional crosslinking agent manufactured by ChemSultants, Inc. It reacts with carboxylic acid groups to create a stable crosslink at elevated temperatures and can be used to stabilize polymer gels and other water sensitive gel systems. Carbafill™ is available in a variety of grades, sizes and quantities.
